

NEW VISION FOR VISITORS

GLOBAL HEADQUARTERS FOR RAPTOR CONSERVATION

Hawk Mountain has inspired every count site and hundreds of educators around the globe. We are the first and best raptor conservation organization having mentored more than 500 raptor conservation leaders. This facility is our visitor's first encounter with this important mission.

The next step will be to raise significant funds to make it happen.

TOP GOALS AND OBJECTIVES

Educate All

Create a fully accessible and inclusive center that introduces people to the world of raptor conservation, science, and Appalachian ecology as a launching point to the Sanctuary

Preserve Tradition

Blend modern elements seamlessly with historic materials and native and/or locally sourced stone and wood

Promote Science

Honor our history while sharing the latest in global raptor conservation science, training, and conservation

Keep it Green

Model sustainable building practices that will improve efficiency, reduce impact, and offer education opportunities that inspire raptor conservation through education, science, and stewardship

HIGHLIGHTS

- Eliminate the downstairs gallery to open the space and remove accessibility barriers
- Create a welcoming point to learn about raptors and their amazing migrations
- Improve visitor flow, relocating the store to one distinct area
- Demonstrate best practices in sustainable and energy efficient design
- Relocate some raptor enclosures to better connect people with live raptors
- Provide an open and more flexible space with more natural light
- Model the latest bird-friendly window techniques
- Recycle and repurpose much of the current footprint and structure

POWERED BY PASSION INSPIRED BY COLLABORATION

The vision to upgrade and enhance the Visitor Center follows a two-year-long planning process with broad stakeholder input. This work will address our aging infrastructure and capstone two decades of strategic improvements: opening the Acopian Center in 2002, upgrading the Education Building in 2013, constructing our first ADA trail in 2015, and completing the Amphitheater and ADA connector trail in 2021.
